

## Deliver court-ready documents, faster.

Litigation Companion is a document review and Table of Authorities (TOA) creation solution that flags hard-to-find errors and builds a TOA in minutes—not hours—powered by the Best Authority engine trusted by over 90% of the AmLaw 100.

## Why Litigation Companion?

Between investigating claims, building cases through fact development and legal research, and drafting pleadings and briefs, litigation teams have a huge caseload. They face pressure to make documents right and, to mitigate potential issues, often wait until the last minute to create a tedious TOA that takes hours in a stressful race against the filing deadline.

### Work Smarter

Let technology handle the review and TOA processes to eliminate stress at the 11<sup>th</sup> hour and allow the team to focus more on higher-priority work.

### Improve Quality

Go beyond spellcheck with the ability to automatically catch then fix all hard-to-find errors and confirm the accuracy of citation formats.

### Reduce Risks

Implement last-minute changes quickly and accurately with searchable TOAs, helping the team meet deadlines and avoid re-work.

**Steven Heller**  
 Director of Technology  
 Graubard Miller

“Before, litigators would read through their document, highlight citations, and manually mark them. Now, Litigation Companion automatically detects and codes each citation and generates a TOA with a click of a button, helping litigators quickly and efficiently check their document and ensure consistent formatting.”

## Key Features

### TOAs powered by Best Authority

Automatically find and mark all citations in a brief and create an accurate, correctly sorted, and formatted TOA in minutes, not hours.

### Document Review

Quickly check then fix all errors and logical inconsistencies with names, dates, and locations, and review color-coded citations in the TOA review pane.

### Update TOAs with Review Mode

Edit TOAs directly in the preview panel and know that customizations are saved upon rescan. Search for specific citations or only what has changed.

### Case Validation

Confirm the citations used are in court-approved formats and up to date with the Lexis Advance and Fastcase integrations.

## Integrations

- Microsoft Office
- Microsoft SharePoint
- iManage
- OpenText
- Worldox
- NetDocuments
- Google G Suite
- Lexis Advance
- Fastcase
